

Navigation Report

5-11-22

1. We are just now coming down off of a fairly significant high-water event. I am unaware of any major issues, so that is a positive. Let's make sure we don't get complacent and keep that trend moving in the positive direction.
2. Major drift issues at Bellville lock due to the high water. Locking has resumed, but it is moving at a slow pace. It should continue to flush and get better as the water recedes.
3. Tentative Huntington District Repair Schedule
Belleville L&D – Repairs are underway – Delays are fairly significant due to the drift/water issues as well on top of this.
 - Repair Upper Main Chamber Miter Gates and Filling and Emptying Culvert System Wire Rope Replacements
 - 2 May - 24 Jun Main Chamber Closure**Greenup L&D – Repairs are underway – Delays have not been as bad as Bellville at this point. They seem to be staying under a day total.**
 - Upstream Main Chamber Miter Gate Repairs and River Wall Filling System Culvert Valve Repair
 - 1 May - 29 Jun Main Chamber Closure
4. Montgomery Small Chamber Closure Schedule / NTNI for Drilling operations has been sent out to industry and posted on the public site. Please be aware of this June through August.
